

ONE PLATFORM. EVERY AGENCY. REAL-TIME COMMUNICATION.

Secure Public Safety Messaging & Collaboration

BRIDGE
Public Safety

Uvalde. Nashville. Maui. Lewiston. Butler.
Different incidents, different states, but the
after-action reports say the same thing every
time: someone had critical information that
someone else didn't get in time.

When seconds matter, disconnected systems
cost lives. Bridge4PS is a secure mobile and
desktop communications app built
specifically for first responders — connecting
teams, departments, agencies, and
jurisdictions in real time.

THE PROBLEM

Text messaging is the most widely used communication tool in public safety today, but it was never built into the Incident Command System. That gap creates real risk during multi-agency incidents:

- ✗ **No structure** — radios have channels and protocols; texting doesn't.
- ✗ **No directory** — responders depend on personal phone numbers being saved correctly.
- ✗ **No oversight** — command staff can't monitor, manage, or audit conversations.
- ✗ **No security** — consumer apps aren't built to protect sensitive public safety data.
- ✗ **No accountability** — retired or transferred personnel remain in group texts.
- ✗ **No compliance** — consumer apps can't meet records retention and open records laws.

THE SOLUTION

Bridge4PS is a secure mobile and desktop communications and data-sharing platform built exclusively for Law Enforcement, Fire Departments, Emergency Management, Transportation, and critical infrastructure — Governmental and Non-Governmental Public Safety organizations alike.

**SECURE INDIVIDUAL/
GROUP MESSAGING**

**SECURE VOICE/
VIDEO CALLING**

**EXCLUSIVE PUBLIC SAFETY
USER COMMUNITY**

**FULLY VISIBLE NATIONWIDE
USER DIRECTORY**

**SECURE FILE/PICTURE/
VIDEO SHARING**

**FULLY
EXPORTABLE**

CONNECT TEAMS, DEPARTMENTS, AGENCIES, AND JURISDICTIONS IN REAL TIME.

- ✓ Verified, public-safety-only nationwide directory
- ✓ Persistent, structured operational channels
- ✓ Secure messaging, photo, video, and file sharing
- ✓ Certified encryption
- ✓ Full auditability and records retention
- ✓ Cross-agency, cross-jurisdiction interoperability
- ✓ Available on iOS, Android, desktop, and web

“Bridge4PS made it much easier to share information in real time and keep everyone working from the same operational picture.”
